13. (CURRENTLY AMENDED) A method of reading cards during a casino card table game comprising:
 - a. providing a card reading device for reading spent cards collected at a conclusion of a round of play of the casino table card game;
 - b. placing a set of spent cards, but less than a complete deck of cards into a card in-feed area of the card reading device at the conclusion of a round of play of the casino table card game,
 - c. moving the spent cards one at a time from a bottom of the set of spent cards in the in-feed area,
 - d. reading at least one of the suit and rank of each spent card before the spent card is deposited into a card collection area of the card reading device, and
 - e. determining composition of hands played in the round of play of the casino table card game by sending a signal representing the at least one of rank and suit of each spent card in an order in which each spent card was placed in the card in-feed area, wherein the signal is [[used]] sent to a processor where the signal of information of at least one of the suit and rank of the individual cards is processed [to determine composition of hands played in the round of play of the casino table card game].

14. (ORIGINAL) The method of claim 13 wherein the card collection area is an elevator with a support surface, and the support surface is lowered as more cards are fed into the card collection area.

15. (ORIGINAL) The method of claim 13 wherein images of symbols representing suit and rank are taken discontinuously.

16. (ORIGINAL) The method of claim 15 wherein snapshot images of symbols are triggered by cards being sensed by trigger sensors.

17. (CURRENTLY AMENDED) The method of claim 13 wherein spent cards consist of a single hand of spent cards placed into the card in-feed area, and only the single hand of spent cards is read to determine the single spent hand card composition.

18. (CURRENTLY AMENDED) The method of claim 13 wherein spent cards consist of at least a single hand of spent cards placed as a group into the card in-feed area, but less than a complete deck of cards, and only the spent cards placed as a group are read to determine the composition of hands at the least one single hand spent cards.

19. (CURRENTLY AMENDED) The method of claim 13 wherein spent cards consist of multiple hands of spent cards placed into the card in-feed area but less than a complete deck of cards.

20. (PREVIOUSLY PRESENTED) The method of claim 14 wherein spent cards consist of a single hand of spent cards placed into the card in-feed area.

21. (CURRENTLY AMENDED) The method of claim 13 wherein spent cards consist of multiple hands of spent cards placed into the card in-feed area, but less than a complete deck of cards.

22. (PREVIOUSLY PRESENTED) The method of claim 13 wherein the image capture device operates discontinuously to read the at least one of suit and rank of spent cards.

23. (PREVIOUSLY PRESENTED) The method of claim 13 wherein the image capture device is triggered to capture an image by a sensor that senses card location.
